

## BRIEF SUMMARY

I'm a BBA Computer Applications student at MIT Arts, Commerce & Science College, passionate about IT management and software development.

I enjoy exploring new technologies to improve processes and solve real-world problems. While still a student, I'm eager to gain hands-on experience and grow in the industry.

As a student leader in multiple intercollegiate events, I've managed large teams, assigned tasks, and conducted meetings, helping me develop strong team coordination and event planning skills.

I've worked on the Volunteer-Based Event Management System, contributing to event coordination, resource tracking, and AI-powered optimization. The documentation is complete, and development is in progress, giving me valuable insight into project management.

I have foundational knowledge in programming language like C, C++, DBMS, along with AI prompting, educational content creation, and PowerPoint presentations. I'm always looking to expand my knowledge and apply it in practical scenarios.

Beyond technical expertise, I've honed my leadership, teamwork, problem-solving, adaptability, decision-making, and time management skills. Fluent in English, Hindi, and Marathi, with an understanding of Telugu, I thrive in dynamic environments and enjoy collaborating with others.

Currently, I'm seeking opportunities in IT management and software development, where I can apply my skills, gain real-world experience, and make a meaningful impact.
